SERVICE STATISTICS

- *Assignment Processing* — The Assignment and Certification Branches have been combined under one Division and an attorney/manager has been appointed to provide legal advice and closer control of operations. We have ascertained that substantial backlogs exist in a number of different processing steps for both patent and trademark assignments. Our goal is to reduce the backlogs by Jan. 31, 1989. We have instituted a number of changes to expedite processing such as using data worksheets to speed typing of trademark cards and instituting a quality review step early in processing to more quickly catch errors. We are also addressing problems in reporting, especially documenting and tracking incoming work and production.

The definitions of items reported under Service Statistics are:

Recording Trademark Assignments—The number of days from receipt in the PTO (recording date) to the filing of cards in the Assignment Search Room.

Receipt Date of Trademark Documents Returned—The date of receipt in the PTO of assignments most recently processed and mailed back.

Because patent assignments are received in the Assignment Branch from both the Mail Room and from Application Division (when they are filed with new applications), a variety of Mail Room receipt dates are in process at any given time. During the next month we will explore means to capture and report on the processing times for various types of patent assignments received. For this month, the processing time reported reflects that of the bulk of the work now being processed.

Resolving the assignments reporting issues, as well as getting back on target, are high priorities.

IMPROVEMENT TO SERVICE

- *Fee Postings* — As a result of a suggestion from a member of the public, bulletin boards, containing a listing of all PTO fees, have been installed at the Attorney's Window in the Mail Room and at the Cashier's Window in the Finance Office.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions,* and provides technical staff assistance in their use to aid the public, in gaining effective access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
